GJC70-30 Cementing Mixing Truck (GJQ70-30)

Truck-Mounted Twin-Pump Cementing Mixing Unit

The GJC70-30 (GJQ70-30) cementing mixing truck is equipped with two vertical triplex plunger pumps on the chassis, driven by two CAT diesel engines. It uses an automatic two-step (ADC) slurry mixing system with centralized electric, air, hydraulic and mechanical control operated by one person.

Technical Specifications

Pump Configuration	Two vertical triplex plunger pumps
Deck Engine	Two CAT diesel engines
Mixing System	ADC auto-controlled, two-step slurry mixing
Fluid End	One-piece fluid end; nickel-sprayed plungers
Power End	Welded steel plate construction
Drive	Hydraulic drive & chain drive
Safety	Over-pressure shutdown device
Chassis Options	Mercedes-Benz, Kenworth, Volvo, IHC, Tatra (or customer-specified)
Maximum Pressure / Displacement / Weight / Dimensions	Published configuration details available on request

Typical Applications

- High-pressure cementing operations
- Cleanout, acidizing and sand control
- Fracturing support in deep, medium and shallow oilfields

Certification & Testing: API · HSE · ISO 9001:2008 Certified Manufacturer | Established in 2006. This unit is designed and built for oilfield service duty; full factory test reports and configuration data are available on request.

This product page describes configuration and features; numeric pressure, displacement, weight and dimension values are not listed on the source page and are available on request.
